

What is RinkWater®?

RinkWater® makes it easy to flood and maintain outdoor rinks—without the cost or hassle of constructing and operating a building.

Our patented, self-contained unit installs directly in your park or green space, providing secure, year-round water access with an optional irrigation connection.

Benefits

Lower Cost

Cuts expenses by eliminating the need for a facility, water trucks, or fire hydrant coordination—saving thousands.

Durable Design

Engineered to withstand extreme weather (down to -50°C) and heavy community use, with no fragile components.

Water Safety & Compliance

Fully code-compliant, prevents contamination, and tracks water usage for accountability.

Ease of Use

Fast, hassle-free flooding—so community volunteers can create great ice with ease.

RINKWATER®

RinkWater® was created from a deep passion for building and maintaining outdoor rinks.

With indoor ice time becoming harder to access, families and communities are turning to outdoor activities to stay active and connected. Skating and hockey remain favorite winter pastimes across Canada—and anywhere winter sports thrive.

We're here to make ice-making simple, reliable, and enjoyable. At the end of the day, our goal is the same as yours: to keep people outside, active, and having fun.

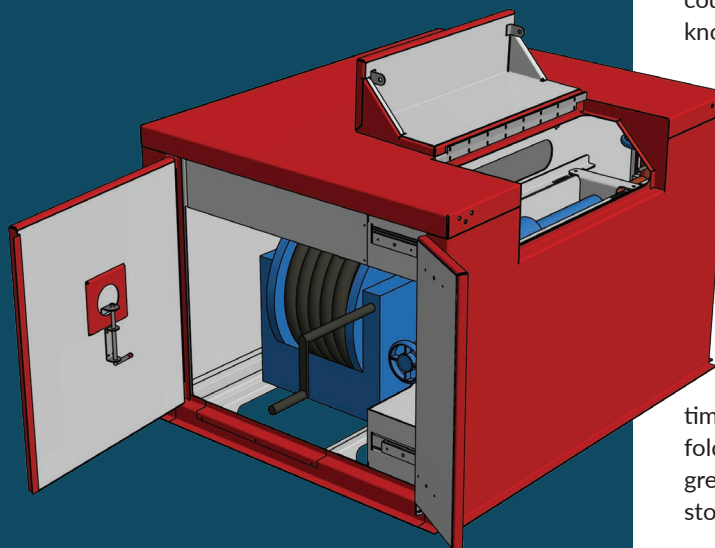

MADE IN CALGARY

Key Features:

- 25mm (1") Thick, Insulated 2-ply Aluminium Enclosure
- Internal LED Lighting
- Motorized Retractable Hose Reel with Porthole, 61m (200') x 40mm (1.5") Lay-flat Firehose & Nozzle
- Includes 40mm 9' Self-draining Dry Hydrant, Backflow Prevention, & Freeze-proof Ball Valve
- 1500w Heater with Adjustable Thermostat
- Vandal Resistant Customizable Vinyl Wrap
- Viewing Window for Municipal Electrical Meter
- Dimensions:
1640mmx1330mmx1080mm(LxWxH)

Site Requirements:

- 120/240vac, Single-phase 60amp Power Supply
- 50mm Municipal Water Supply
- 2.8m x 2.5m Concrete Pad

Testimonial

As a second-generation outdoor rink flooder, I remember the days of helping my father shoveling snow by hand, thawing out fire hoses and then folding them up nicely when we were done. It took some time and some of those nights were cold!

Having the ability to create beautiful ice with minimum manpower was something that I thought could not be done. Every outdoor rink rat in Calgary knows that ice making in this city is about as much as an art as it is a science. Well the RinkWater® system has given our teams in Rocky Ridge and Royal Oak that advantage needed in creating beautiful ice on an outdoor rink.

We are fortunate enough now to have machines to clear snow but the real magic and beauty is the RinkWater® box. The teams are able to flood the rink in under 10 minutes. When conditions and temperatures are right, the teams consistently were able to flood our rink up to 3 times a night. No frozen hoses, no cumbersome folding techniques, excellent water pressure and a great secure box that is heated which looks nice and stores the equipment in an efficient way.

With all that, comes excellent engineering of the box and customer service from the people at RinkWater®. The team at RinkWater® have been very responsive with any questions we had with the system and are always checking in with our community about how their product is working. This is an excellent product which I believe is now the gold standard in outdoor rink flooding with a great team at RinkWater® that stands behind their product.

Kris Kasper

Director of Parks
Rocky Ridge Royal Oak Community Association
